

Special Issue

Bioprocess and Fermentation Monitoring

Message from the Guest Editor

In recent years, the food industry has had a clear need for simple, rapid, and cost-effective techniques for objectively evaluating the quality and composition of the foods that we produce and consume. Several methods and techniques, such as spectroscopy (e.g., near- and mid-infrared), biosensors, and electronic noses and tongues have been used to monitor and assess the bioprocesses and fermentation of several foods, such as meat, wine, and other agricultural products. This Special Issue invites researchers and industry to submit short communications, reviews or full research papers addressing novel applications related to bioprocessing and monitoring fermentation.

About the Journal

Message from the Editor-in-Chief

Welcome to an open access journal, *Fermentation*, which meets the growing need for a high quality peer-reviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this journal and look forward to working with you to make *Fermentation* a leader in its field. Your contributions are vital for the success of this journal. Proposals for editing a special issue for a particular topical area are always welcome.

Editor-in-Chief

Prof. Dr. Christian Kennes
Department of Chemical Engineering, Faculty of Sciences, University of La Coruña, La Coruña, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /
CiteScore - Q1 (Plant Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
