# Microbial Foods—The Science of Fermented Foods

## Message from the Guest Editor

Fermented foods are the result of the metabolic activity of a complex microbiota, consisting of the indigenous microorganisms naturally associated with the raw materials, and/or selected microorganisms (bacteria, veasts) inoculated as starter cultures. Traditional fermented foods represent a valuable cultural heritage in most regions, and harbor a vast genetic potential of valuable strains. The study of the microbial ecology of naturally fermented foods and the identification of microbial diversity using metagenomic approaches are of interest. Metabolomic and proteomic approaches are also important to study the physiology and genetics of microorganisms. This Special Issue on "Microbial Foods -The Science of Fermented Foods" will also include studies on modern/rapid tools to monitor the fermentation procedure in order to ensure the quality and safety of the final product.

## **About the Journal**

## Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

### **Editor-in-Chief**

Prof. Dr. Christian Kennes

Department of Chemical Engineering, Faculty of Sciences, University of La Coruña, La Coruña, Spain

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) / CiteScore - Q1 (Plant Science)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
