

Special Issue

Current and Future Trends in Food Waste Valorization for the Production of Value-Added Products

Message from the Guest Editors

The goal of this Special Issue is to showcase works that are involved in food waste valorisation to produce value-added products. This includes, but is not limited to, the use of the following techniques: fermentation, genetic engineering, novel processing, the separation or extraction of value-added products from food waste, and analytical methods applied to analyse the value-added products. The application of these value-added products to products would also fall within the scope of this Special Issue. The characterisation of food waste extracts is not within the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Editor-in-Chief

Dr. Badal C. Saha
Retired, National Center for Agricultural Utilization Research, USDA-
ARS, Peoria, IL, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /
CiteScore - Q1 (Plant Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
