

# Special Issue

## Membrane Bioreactors

### Message from the Guest Editor

Membrane Bioreactors (MBR) have had a great development as of the last few decades. The notable development of MBR in industry has been for wastewater treatment. The advantage of MBR is to create high cell density in bioreactors, and, therefore, to reduce the retention time of the fermentation process. As the technology develops, the attention to MBR for other applications in fermentation processes, to produce energy, biofuels, and biomaterials, is increasing. This Special Issue is dedicated to exploring advanced applications and developments of MBR in fermentation technology. Prof. Dr. Mohammad J. Taherzadeh

## About the Journal

### Message from the Editor-in-Chief

Welcome to an open access journal, *Fermentation*, which meets the growing need for a high quality peer-reviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this journal and look forward to working with you to make *Fermentation* a leader in its field. Your contributions are vital for the success of this journal. Proposals for editing a special issue for a particular topical area are always welcome.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /  
CiteScore - Q1 (Plant Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
