

Special Issue

Safety and Microbiological Quality

Message from the Guest Editors

Safety issues are related to the control of growth and persistence of foodborne pathogens, but also to the presence of toxic compounds, such as mycotoxins, biogenic amines, ethylcarbamate or other chemical hazards, formed over fermentation. Moreover, fermentation of some plant-derived foods aims to decrease the level of toxic molecules, like cyanogens and other anti-nutritional factors. This Special Issue will consider manuscripts dealing with management or control of chemical or microbiological hazards, including HACCP approaches and ferment quality. In addition, microbiological quality of fermented foods and beverages is closely connected to sensory or nutritional quality, may influence shelf-life of resulting products by the control of microbial spoilage but also can directly influence process reproducibility. Lastly, microbial activity in fermented products can impact intestinal microbiota of host. Hence, this issue will also focus on the management of microorganisms to ensure a high microbiological quality.

Guest Editors

Prof. Dr. Fabienne Remize

SPO, Univ La Réunion, Univ Montpellier, INRAE, Montpellier SupAgro, Montpellier, France

Dr. Didier Montet

CIRAD, UMR QualiSud, 73 rue Jean Francois Breton, F-34398 Montpellier, France

Deadline for manuscript submissions

closed (30 April 2019)

About the Journal

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Editor-in-Chief

Dr. Badal C. Saha
Retired, National Center for Agricultural Utilization Research, USDA-
ARS, Peoria, IL, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /
CiteScore - Q1 (Plant Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
