Deadline for manuscript submissions:
closed (31 January 2021)

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to comprise the current knowledge of all topics involved in the understanding of WPCs as a bio-based thermoplastic composite. The topic starts with theoretical approaches regarding composite behavior, and includes the influence of raw materials and additives, processing, including pretreatments and post treatments, up to the understanding of long-term material behaviors in service. Very welcome are studies that investigates the variability of composites, e.g., wood source, fiber, particle size, etc.

Message from the Editor-in-Chief

Fibers is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), PubAg, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: CiteScore - Q1 (*Civil and Structural Engineering*)
