

Special Issue

Natural Fibers for Advanced Materials: Addressing Challenges

Message from the Guest Editors

Natural fibers are renewable resources offering sustainable raw materials and eco-friendly fibers for textiles and advanced materials. They outshine synthetic fibers by diminishing reliance on petroleum, cutting carbon footprints, curbing pollution, and promoting a circular economy through biomass or agricultural waste. Despite benefits like abundance and biodegradability, natural fibers are mainly used in breathable clothing, luxury textiles, and ropes, with limited adoption in construction and packaging. Notably, competing synthetic fibers are scarce in these applications. In the broader advanced material spectrum, challenges include uniformity, processing scale, compatibility, strength impacted by biomass growth, moisture absorption, and stability. This Special Issue focuses on recent efforts to tackle these issues, enhancing consistency, utilizing inherent properties, and yielding more reliable materials.

About the Journal

Message from the Editor-in-Chief

Fibers is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

Editor-in-Chief

Prof. Dr. Martin J. D. Clift

In Vitro Toxicology Group, Institute of Life Sciences 1, Swansea
University Medical School (SUMS), Swansea SA2 8PP, Wales, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei
Compendex, PubAg, CAPlus / SciFinder, Inspec, and other
databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary) / CiteScore
- Q1 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 23.3 days after
submission; acceptance to publication is undertaken in 5.8
days (median values for papers published in this journal in
the first half of 2025).
