

Special Issue

Natural Fibers and Composites: Science and Applications

Message from the Guest Editor

The global awareness of environmental issues has resulted in the emergence of economically and environmentally friendly materials free from the traditional side effects of synthetics, by using biorenewable materials. In this direction, natural fibers from different biorenewable resources have attracted considerable attraction from the research community from all around the globe, owing to their unique intrinsic properties, such as their biodegradability, easy availability, environmental friendliness, flexibility, easy processing, and impressive physico-mechanical properties. Natural cellulose fiber-based materials are finding their applications in a number of fields, ranging from automotive to biomedical. Natural fibers have been frequently used as the reinforcement in polymers in order to add the specific properties in the final product. This Special Issue is devoted to the advancements made in the field of natural fibers and composites, including the processing methods and potential applications of green composites.

About the Journal

Message from the Editor-in-Chief

Fibers is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

Editor-in-Chief

Prof. Dr. Martin J. D. Clift

In Vitro Toxicology Group, Institute of Life Sciences 1, Swansea
University Medical School (SUMS), Swansea SA2 8PP, Wales, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, PubAg, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary) / CiteScore - Q1 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
