# Special Issue

# Polymer Hollow Fiber Membrane

### Message from the Guest Editor

Polymeric hollow fiber membranes have become exceedingly important in different fields of application, including waste-water treatment, desalination, gas separation, pervaporation, agriculture, medicine, tissue engineering, etc. This Special Issue aims to capture the recent scientific and technological advances in the development of polymeric hollow fiber membranes (PHFMs), and their potential applications. The Special Issue will also seriously consider the challenges and future research directions. Considering your extensive knowledge and experience in this field, I would like to invite you to contribute original research articles, as well as review articles, to this Special Issue, which will increase the basic and cutting-edge subject knowledge on hollow fibers and may lead to the development of new technologies and innovations for their efficient and economic utilization.

# About the Journal

## Message from the Editor-in-Chief

*Fibers* is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.
We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

## Editor-in-Chief

Prof. Dr. Martin J. D. Clift
In Vitro Toxicology Group, Institute of Life Sciences 1, Swansea University Medical School (SUMS), Swansea SA2 8PP, Wales, UK

## Author Benefits

### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, PubAg, CAPlus / SciFinder, Inspec, and other databases.

### Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary) / CiteScore - Q1 (Civil and Structural Engineering)

### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
