Recent Advances on Risk Analysis and Assessment

Message from the Guest Editors

This Special Issue is dedicated to the [9th International Conference on Risk Analysis \(ICRA9\)](#), focuses on the broad topic of “Risk Analysis and Assessment”, and includes novel research on the use of methods and techniques for analysing and modelling the risk in different, real contexts. We welcome theoretical and empirical articles on the application of novel computational techniques in estimation, simulation, and prediction in risk analysis and assessment with applications to risk assessment and management in diverse fields, such as:

- Life/biological sciences;
- Environmental sciences;
- Public health;
- Economics and finance;
- Reliability engineering;
- Technical, biological, and biomedical systems;
- Computer science;
- Social sciences.

In particular, contributions focusing on high-dimensional applications in today's complex world and/or novel measures of risk (financial, environmental, clinical, and so on), are encouraged.
