Deadline for manuscript  
submissions:

**closed (30 November 2024)**

### Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to contribute to this Special Issue of *Fire*, entitled 'Recent Progress in Fire Ecology and Management in Tropical and Subtropical Ecosystems'. Fire is recognized as a fundamental ecological process with a pivotal role in shaping the evolution and function of several ecosystems worldwide. Fire events may cause local species extinction, modify populations and communities, drive successional patterns, and affect carbon and nutrient cycling.

The occurrence of both natural and anthropogenic wildfires is markedly increasing around the globe. This increase is caused not only by climatic events (e.g., severe droughts and hotter days) but also directly by human activities. The tropical and subtropical ecosystems (including rainforests, seasonal forests, savannas, and grasslands) have been greatly affected by this increase in fire frequency. Good-quality and adequate scientific information regarding the effects of fire events (both natural and man-made) on these ecosystems is essential.

## Message from the Editor-in-Chief

*Fire* is an international open-access journal about the science, policy, and technology of fires and how they interact with communities and the environment. *Fire* seeks to provide a forum to help the fire science community convey how we can live with fire in a changing world. *Fire* seeks submissions from interdisciplinary studies that take a pyrogeography perspective of fires occurring in natural, cultural, and industrial landscapes and how they interact with communities in the science-policy interface. *Fire*'s Editorial Board are widely recognized international leaders. The journal emphasizes quality and innovation and has a rigorous peer-review process. I strongly recommend *Fire* for the rapid publication of your innovative research publications and case studies.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **AGRIS**, **PubAg**, and **other databases**.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
