

Special Issue

Torchbearers: The Next Generation of Fire and Emergency Research

Message from the Guest Editors

The theme of this Special Issue is "research perspectives from the next generation of firefighters, fire engineers, and emergency managers". This Special Issue is targeted at early career researchers from diverse firefighting, fire engineering, and emergency management backgrounds, and presents an opportunity for the next generation of leaders within the field to highlight their work and contributions to the profession. We welcome original research articles and reviews to this Special Issue. Research areas may include (but are not limited to) the following: leadership, diversity, and culture within the fire service; wellbeing and safety; firefighting or rescue strategies and tactics; or fire safety engineering. Senior researchers may partner with early career researchers, as long as the main contributor is the latter.

About the Journal

Message from the Editor-in-Chief

Fire is an international open-access journal about the science, policy, and technology of fires and how they interact with communities and the environment. *Fire* seeks to provide a forum to help the fire science community convey how we can live with fire in a changing world. *Fire* seeks submissions from interdisciplinary studies that take a pyrogeography perspective of fires occurring in natural, cultural, and industrial landscapes and how they interact with communities in the science-policy interface. *Fire's* Editorial Board are widely recognized international leaders. The journal emphasizes quality and innovation and has a rigorous peer-review process. I strongly recommend *Fire* for the rapid publication of your innovative research publications and case studies.
