

Special Issue

Advances in Fire and Combustion Safety

Message from the Guest Editors

Continuous research seeking at the reduction of environmental impacts generated by several industrial fields and climate change effects have raised further challenges for the characterization and quantification of safety aspects related to combustion science. The current special issue aims at gathering information by fundamental-based or case studies investigations, as well as experimental or numerical approaches valuable to fill the highlighted gaps on fire, wildfire, explosion, and more in general on self-accelerating oxidation reactions. Researchers can submit articles presenting innovative studies or literature reviews related to fire safety.

About the Journal

Message from the Editor-in-Chief

Fire is an international open-access journal about the science, policy, and technology of fires and how they interact with communities and the environment. *Fire* seeks to provide a forum to help the fire science community convey how we can live with fire in a changing world. *Fire* seeks submissions from interdisciplinary studies that take a pyrogeography perspective of fires occurring in natural, cultural, and industrial landscapes and how they interact with communities in the science-policy interface. *Fire's* Editorial Board are widely recognized international leaders. The journal emphasizes quality and innovation and has a rigorous peer-review process. I strongly recommend *Fire* for the rapid publication of your innovative research publications and case studies.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
