

Special Issue

Advances in the Measurement of Fuels and Fuel Properties

Message from the Guest Editors

This Special Issue solicits articles on recent advances of the use of laboratory, field, and remote sensing approaches to characterize the properties, arrangement, and quantity of fuels. We are open to all types of articles but Review papers and Technical Notes describing common or new approaches to measure fuel and fuel properties, are particularly encouraged. Topics are invited across the entire spectrum of fire science, including fuels in structural and wildland fire science environments. **Keywords**

- fuels
- remote sensing
- field measurements
- fuel properties
- chemical composition
- LiDAR
- drones

About the Journal

Message from the Editor-in-Chief

Fire is an international open-access journal about the science, policy, and technology of fires and how they interact with communities and the environment. *Fire* seeks to provide a forum to help the fire science community convey how we can live with fire in a changing world. *Fire* seeks submissions from interdisciplinary studies that take a pyrogeography perspective of fires occurring in natural, cultural, and industrial landscapes and how they interact with communities in the science-policy interface. *Fire's* Editorial Board are widely recognized international leaders. The journal emphasizes quality and innovation and has a rigorous peer-review process. I strongly recommend *Fire* for the rapid publication of your innovative research publications and case studies.

Editor-in-Chief

Dr. Grant Williamson

Hobart, TAS 7001, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
