

## Special Issue

# Genetics and Genomics of Fish

### Message from the Guest Editor

With over 34,000 species in the world, living fish offer vast opportunities for research on genetic diversity, evolution, and adaptation to different environments. The genetics and genomics of fish is a fascinating field with broad-reaching implications for both scientific research and practical applications. It can provide insights into the evolution of fish species and the impact of environmental changes on fish populations, help in the identification of new genetic traits that may be beneficial for aquaculture or sustainable management practices, and aid in the development of tools for disease diagnosis and treatment. This Special Issue invite research papers and reviews on multidisciplinary topics in the broad field of fish genetics and genomics.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
