Microbial Pathogens, Disease Control and Veterinary Drug Use in Aquaculture

Message from the Guest Editors

Aquaculture is one of the world's fastest growing food production sectors. However, infectious diseases heavily limit the sustainable development of this industry. Thus, knowledge about microbial pathogens, disease control, and veterinary drug use in aquaculture is vital for the reduction of infectious disease outbreaks. The Special Issue is focused on sharing research relating to all aspects of microbial pathogens, diseases control, and veterinary drug use in aquaculture, to contribute to aquatic animal health and improve healthy aquaculture. We are pleased to invite you to collaborate with original research articles (basic and applied) or reviews in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
