

## Special Issue

# Reproduction, Embryogenesis and Larviculture of Fish in Captivity

### Message from the Guest Editor

The production of any species in captivity requires mastery over the production of their juvenile forms, that is, successful reproduction. In fish, this is no different, and the process usually involves three stages: reproduction, larviculture, and fry production. For each species, these processes can be either more difficult or easier and more complex or simpler; however, only with mastery of all three stages can we ensure the successful production of juvenile forms. This Special Issue aims to gather contributions from studies involving any of these stages that offer solutions to common problems and unresolved issues and advances in these areas. We encourage researchers to submit their results and contribute to the progress of aquaculture.

### Guest Editor

Dr. Sergio Ricardo Batlouni

Aquaculture Center of Sao Paulo State University–CAUNESP, São Paulo State University–UNESP, Via de Acesso Prof. Paulo Donato Castellane, S/N, Jaboticabal 14884-900, SP, Brazil

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
