

Special Issue

Reproduction, Embryogenesis and Larviculture of Fish in Captivity

Message from the Guest Editor

The production of any species in captivity requires mastery over the production of their juvenile forms, that is, successful reproduction. In fish, this is no different, and the process usually involves three stages: reproduction, larviculture, and fry production. For each species, these processes can be either more difficult or easier and more complex or simpler; however, only with mastery of all three stages can we ensure the successful production of juvenile forms. This Special Issue aims to gather contributions from studies involving any of these stages that offer solutions to common problems and unresolved issues and advances in these areas. We encourage researchers to submit their results and contribute to the progress of aquaculture.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
