

Special Issue

Sustainable Catfish Aquaculture

Message from the Guest Editors

This Special Issue entitled Sustainable Catfish Aquaculture aims to provide a comprehensive overview of the current state of catfish aquaculture and its role in promoting sustainable development. The scope of this Special Issue covers a wide range of topics, including advances in breeding and genetics, feeding and nutrition, disease management, economics, water quality, and aquaculture system design. Additionally, it aims to highlight the challenges and opportunities in the catfish industry, such as the integration of sustainable practices, the importance of environmental management, and the use of renewable energy sources. The Special Issue seeks to bring together experts in the field to provide insights and recommendations for the future development of catfish aquaculture and to promote sustainable practices in the industry.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
