

# Special Issue

## Advances in Fisheries Economics

### Message from the Guest Editor

The Special Issue aims to present the latest advances in fisheries economics to support evidence-based policy and management. We welcome original research articles, comprehensive reviews, and perspective papers on topics including, but not limited to:

- Bioeconomic modeling of fishery systems under environmental and economic uncertainty;
- Economic valuation of marine and freshwater ecosystem services;
- Impacts and reform of fisheries subsidies and economic incentives;
- Cost–benefit analysis of fisheries management policies (e.g., MPAs, ITQs, seasonal closures);
- Market dynamics, seafood trade, and consumer behavior in global supply chains;
- Economics of small-scale, artisanal, and community-based fisheries;
- Behavioral and experimental economics in fisheries decision-making;
- Innovation, efficiency, and economic sustainability in fishery production and post-harvest systems;
- Strategies to strengthen the resilience of the fisheries industry chain.

By bringing together diverse perspectives and high-quality research, this Special Issue will contribute to a deeper understanding of the economic forces shaping fisheries today and help guide sustainable and equitable solutions for the future.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
