

## Special Issue

# Advances in Aquatic Diseases and Immunity in Aquaculture

### Message from the Guest Editors

Aquatic diseases have always restricted the sustainable development of the aquaculture industry. In recent years, they have caused increasing harm to aquatic animals, and there have been 20% losses in aquaculture production. These diseases, including bacteria, virus, parasites, and nutritive diseases, are difficult to control, and thus, comprehensive studies on the host's immune characteristics, particularly causal immune factors for disease occurrence, play a crucial role in developing therapeutic and preventive measures. This Special Issue aims to collect original research articles, perspectives, and reviews on advances in aquatic diseases and immunity in aquaculture, especially host immune signals, pathogen virulence, and interactions between the host and pathogen.

### Guest Editors

Dr. Defeng Zhang

Pearl River Fisheries Research Institute, Chinese Academy of Fishery Sciences, Guangzhou 510380, China

Dr. Dongling Zhang

Fishery College, Jimei University, Xiamen 361021, China

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
