

Special Issue

Community Ecology of Freshwater Animals and Biodiversity

Message from the Guest Editors

This Special Issue, titled “Community Ecology of Freshwater Animals and Biodiversity”, brings together articles that explore the structure, behaviour, dynamics, and functioning of freshwater communities, with a particular focus on freshwater fish. These organisms play a central role in aquatic ecosystems and are excellent models for understanding patterns of diversity, biotic interactions, and responses to climate change. This Special Issue includes a variety of ecological approaches, ranging from experimental and observational studies to modelling and theoretical syntheses, covering both local and regional scales. By highlighting recent advances in community ecology and biodiversity conservation, this collection will improve our understanding of the processes that shape these communities and support strategies for the sustainable management of inland water resources.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
