

## Special Issue

# The Roles of Fishery Biology and Fish Population Dynamics in Fisheries Management—2nd Edition

### Message from the Guest Editor

Authors are invited to submit original articles and reviews to this Special Issue regarding the classic fishery biology and population dynamics of exploited resources (fish, mollusk, crustacean), as well as analyses based on poor data modeling, which are useful for assessing and managing small-scale and artisanal fisheries from around the globe. Submissions that offer new insights and approaches that contribute to the improvement of the evaluation and management of fishery resources are particularly encouraged. Topics of interest include novel research concerning fishery biology, fish population dynamics, fishing ecology, stock assessment, data-limited fishery management, fishery resource management, artisanal fishing, coastal fishing, and fishing in protected areas.

- fishery biology
- fish population dynamics
- fishing ecology
- stock assessment
- data-limited fisheries management
- fishery resource management
- artisanal fishing
- coastal fishing
- fishing in protected areas

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
