

Special Issue

Advances in Shellfish Aquaculture

Message from the Guest Editors

Shellfish aquaculture plays a vital and expanding role in global food security, providing nutritious protein while offering significant ecosystem services, such as water filtration and habitat enhancement. As the demand for sustainable seafood intensifies amidst growing environmental pressures, the need for innovative research to enhance shellfish production efficiency, resilience, and sustainability is becoming increasingly clear. By highlighting recent advancements and fostering interdisciplinary dialogue, this Special Issue will accelerate innovation, support evidence-based policy, and contribute to the long-term viability and environmental stewardship of the global shellfish aquaculture sector. We invite the submission of original research articles, reviews, and short communications addressing these critical themes and redefining the boundaries of knowledge in shellfish aquaculture science and practice.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
