Impacts of Climate Change on Physiology and Ecology of Aquatic Organisms

Message from the Guest Editors

Climate change is profoundly impacting global aquatic ecosystems, leading to rising water temperatures, ocean acidification, and reduced dissolved oxygen levels—phenomena that threaten the survival and reproduction of aquatic organisms. As a critical link in maintaining ecological balance and sustaining human fishery resources, studying the response mechanisms of aquatic organisms aids in predicting future ecological shifts and developing scientifically sound conservation strategies. To advance research in this field, we invite original research papers or review articles from scientists and scholars exploring how climate-related environmental factors affect the physiological functions, population dynamics, and ecosystem stability of aquatic organisms. This call for papers aims to foster interdisciplinary exchange and provide theoretical support for global climate governance and biodiversity conservation.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
