Toxic Effects of Environmental Exposure on Bivalves

Message from the Guest Editor

We are glad to invite you to submit a paper to contribute to improving current knowledge regarding the toxic impact of environmental stressors on Bivalves. In recent years, the global continuous rise of industrialization and urbanization processes has become a concern for aquatic biota. Among the various species employed in environmental toxicology studies, Bivalvia are certainly one of the most frequently adopted. Nevertheless, several issues regarding the engagement of biological pathways upon exposure to environmental stressors still remain unclear. It is therefore essential to conduct further research in this field given the crucial role it plays at both the ecological and commercial level due to the broad use of many species in aquaculture. We invite the submission of research articles and reviews regarding environmental toxicology in mussels.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
