

Special Issue

Building a Sustainable Future for Inland Fisheries and Aquaculture in a Time of Multiple Stressors

Message from the Guest Editors

The articles in this issue aim to present the most interesting and important research results within certain topics and problems of inland fisheries and aquaculture. The stock assessment and management of freshwater fish with innovative management for the conservation of freshwater areas and aquatic biodiversity together with climate change and its impact on inland waters, fisheries, and aquaculture are crucial themes of this issue. Special interest was expressed in the development of new technologies that will improve production and protect the environment, as well as the inclusion of aquaculture in the circular economy. Themes that process problems of predators, especially piscivorous birds on freshwater fish farms, and the assessment of existing policies covering this problem are specially emphasized. Citizen science and socio-economic aspects of freshwater fisheries and aquaculture, as well as advances in recreational fishery research and management, are included in the topics. Special attention is paid to articles dealing with the problems and conservation of migratory fish and the occurrence of foreign and invasive fish species.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
