

Special Issue

Impact of Plastic and Fiber Pollution on Aquatic Animals

Message from the Guest Editors

This Special Issue, titled "The Impact of Plastic and Fiber Pollution on Aquatic Animals," will encompass work being conducted with all groups of aquatic organisms, with an emphasis on those that are part of the food chains of commercially important fish, mollusks, and crustaceans through coastal and industrial fishing and aquaculture. This Special Issue has been launched to establish the physiological and nutritional effects of plastic and fiber pollution on the quality and safety of these organisms for end consumers. It will provide clear evidence of the problem posed by the lack of wastewater treatment and solid waste management in coastal areas, highlighting the need for re-education and social engagement.

Guest Editors

Prof. Dr. Fabiola Lango-Reynoso

Prof. Dr. María Del Refugio Castañeda-Chávez

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
