

## Special Issue

# Genetics and Breeding in Aquaculture

### Message from the Guest Editor

Aquaculture plays an essential role in addressing the world's increasing food demand. The significance of genetics and breeding in aquaculture is becoming increasingly evident as a result of population development and the depletion of marine resources. The Special Issue “Genetics and Breeding in Aquaculture” highlights the applications of genomics and molecular breeding in aquaculture. Aquaculture has benefited greatly from the extensive application of genomics technologies due to developments in high-throughput sequencing. The focus of the Special Issue is on the use of cutting-edge methods to improve the traits and quality of aquaculture species, such as marker-assisted selection, genome selection, and genome editing. This Special Issue is seeking papers that address the latest developments of genetics and breeding in aquaculture, as well as how these insights might be applied to encourage the advancement of the modern aquaculture industry.

### Guest Editor

Prof. Dr. Xidong Mu

Key Laboratory of Prevention and Control for Aquatic Invasive Alien Species, Ministry of Agriculture and Rural Affairs, Guangdong Modern Recreational Fisheries Engineering Technology Center, Pearl River Fisheries Research Institute, Chinese Academy of Fishery Sciences, Guangzhou, China

### Deadline for manuscript submissions

closed (1 September 2024)

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
