

Special Issue

Selected Papers from 10th Aquaciencia—the Brazilian Congress of Aquaculture and Aquatic Biology

Message from the Guest Editors

Aquaculture is one of the fastest growing food production sectors in the world and Brazil is no exception. However, as Brazil's aquaculture potential becomes a reality, several obstacles and challenges arise that, in most cases, can only be solved with science as a basis. Even with the recent decrease in investments in education, science and innovation, the research landscape in Brazil is gradually evolving. As a result, Brazilian aquaculture has not only increased its production in recent years, but has also witnessed the emergence of new technologies and increasingly diversified production scenarios. This Special Issue of *Fishes* will feature the best papers presented at the 10th edition of Aquaciencia—the Brazilian Congress of Aquaculture and Aquatic Biology. It is expected that this Special Issue will bring together studies that address the most diverse aspects of aquaculture in Brazil, which may include, but is not limited to, hatchery and grow-out technology, species diversification, innovative production systems, integrated aquaculture systems, effects of climate change, impacts, sustainability assessments, etc.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
