

Special Issue

Biodiversity and Spatial Distribution of Fishes, Second Edition

Message from the Guest Editors

This Special Issue mainly involves monitoring, identifying, and updating methods for the biodiversity and distribution of fish in various types of water bodies, with a particular focus on how to effectively evaluate the spatiotemporal distribution of fish caused by changes in fish habitats, such as species distribution models and deep learning methods. Due to the warm welcome of scholars to the first edition of our Special Issue, and although some latest achievements have been published, there are still many new studies awaiting publication. Therefore, at the invitation of a large number of researchers and journals, we will launch a second Special Issue. Once again, we welcome everyone to actively contribute and to delve into this topic, exploring the spatiotemporal distribution and diversity changes in fishery organisms, as well as the possible reasons for these changes, in order to understand the changes in the distribution and diversity of fishery organisms caused by the dual effects of nature and human activities. Original research articles and reviews are welcome in this Special Issue.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
