

# Special Issue

## New Insights on Fish Immunology

### Message from the Guest Editors

We hope this Special Issue could improve our knowledge of fish immunity in both health and disease and help to promote the adoption of sustainable and welfare-oriented therapeutics and prophylactic strategies for aquaculture practices. Contributions related to the following topics are welcome: *the relationships between immune and stromal cells, innate immunity and inflammation, hypersensitivity, immune regulation, infectious diseases and host response, maternal passive immunity, fish-to-fish passive immunization, systems immunology*. Results from novel immunological methods or recent technical advances, *such as single-cell or single-nucleus sequencing and imaging mass cytometry*, etc are also welcome.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
