

## Special Issue

# Advances in Endangered Aquatic Animals Protection

### Message from the Guest Editors

This Special Edition has a relatively broad scope and solicits articles that address the advances in conservation of endangered aquatic animals, including: (1) any new knowledge regarding the life history characteristics of AEAs and threats linked to human activities or environmental changes; (2) any progress or achievements on in situ/ex situ conservations strategies and management; (3) the assessment of the effectiveness of habitat restoration or restocking programs; and (4) progress in breeding and genetic management of captive populations. Theoretical manuscripts are welcomed, as well as papers that describe successful ongoing conservation practices that might have not been described in peer-reviewed literature before.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
