

Special Issue

Stress Physiology in Aquatic Animals

Message from the Guest Editors

This Special Issue emphasizes the physiological and molecular responses to both short-term and long-term biotic and abiotic stresses across a diverse array of vertebrate and invertebrate aquatic species.

Submissions in the form of Original Research Articles, Reviews are encouraged. Potential topics include, but are not limited to, the following: (1) physiological alterations and adaptation processes responding to various stresses; (2) changes in neuroendocrine regulatory systems in mediating responses to environmental stresses; (3) metabolic adaptations of aquatic animals under conditions of environmental stress; (4) omics analyses of aquatic species affected by environmental changes; (5) evolutionary dynamics of stress responses in aquatic animals; (6) immune reactions of aquatic organisms under various forms of environmental stress; (7) effects of environmental stresses on reproduction in aquatic species; (8) influence of ecological changes on the microbiota associated with aquatic animals.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
