

## Special Issue

# Advancing Fish Nutrition Research for Sustainable Aquaculture

### Message from the Guest Editors

We invite researchers, aquaculturists, and industry professionals to contribute to this Special Issue: Advancing Fish Nutrition Research for Sustainable Aquaculture Practices. Key topics include: Enhancing protein sources for aquaculture diets. Using functional additives to improve gut health and growth. Developing plant-based feed alternatives to reduce fishmeal dependency. Promoting the sustainable use of fish by-products for species like grouper, pompano, and barramundi. This Special Issue highlights tropical species' dietary adaptation and explores scalable solutions for temperate and cold-water species. Share your research and help advance sustainable aquaculture globally!

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
