

## Special Issue

# Intelligent Recognition Research for Fish Behavior

### Message from the Guest Editors

The Special Issue focuses on the latest developments in using intelligent and automated techniques for recognizing and analyzing the behavior of fish. Fish behavior is an important area of study for understanding aquatic ecosystems, managing fisheries, and monitoring animal welfare in aquaculture. The specific research topic is dedicated to (1) enhancing the understanding of aquatic ecosystems; (2) supporting the sustainable utilization of fishery resources; (3) promoting the development of aquaculture. This Special Issue aims to showcase applications of machine learning, computer vision, and other state-of-the-art intelligent methods to the study of fish behavior recognition. It calls for original and novel papers related to the following research topics:

- Automated detection, classification, and identification of fish;
- Tracking of individual fish movements and behaviors;
- Analyzing group dynamics and schooling behaviors;
- Monitoring fish health and stress levels;
- Assessing the impacts of environmental changes on fish.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
