

## Special Issue

# Pollution Effects on Aquatic Life

### Message from the Guest Editor

This Special Issue will focus on the adverse effects of environmental toxicants that are continuously being released into the aquatic environment and the response of aquatic animals. This Special Issue is associated with contributions in histomorphological effects, immunological, biochemical and physiological mechanisms of toxicity. Additionally, contributions considering the responses of aquatic animals at species, tissue, cellular and molecular level which may serve to identify biological markers that can be used to study the effects of the toxic exposure will also be considered. Prof. Dr. Ina Wagenaar

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
