

Special Issue

Pollution Effects on Aquatic Life

Message from the Guest Editor

This Special Issue will focus on the adverse effects of environmental toxicants that are continuously being released into the aquatic environment and the response of aquatic animals. This Special Issue is associated with contributions in histomorphological effects, immunological, biochemical and physiological mechanisms of toxicity. Additionally, contributions considering the responses of aquatic animals at species, tissue, cellular and molecular level which may serve to identify biological markers that can be used to study the effects of the toxic exposure will also be considered. Prof. Dr. Ina Wagenaar

Guest Editor

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
