

Special Issue

Advances in Fish Pathology and Parasitology

Message from the Guest Editors

Fish pathology and parasitology are considered significant scientific fields, characterized by their relevant role in specific sectors (such as aquaculture), especially concerning key aspects such as the monitoring of the health status of cultured fish and sustainable productions. Despite their substantial differences, these are undoubtedly complementary disciplines that are useful for better understanding diseases due to parasites in teleost. In some cases, parasitic diseases can promote the health status of their hosts with potentially fatal consequences. This Special Issue aims to provide scientific contributions on general fish pathology and parasitology, as well as host–pathogen interactions, and to improve the current knowledge on the immune adaptation of fish to potential diseases, including new diagnostic approaches and new developments of treatment used against parasitic diseases in both wild and farmed freshwater and seawater fish.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
