

Special Issue

Advances in Feedstuffs for Sustainable and Innovative Aquaculture

Message from the Guest Editors

Experts mention that by 2030, based on global seafood consumption, aquaculture production will be 62%, compared to 38% in fisheries. Aquaculture is one of the industries with the most innovations for food production. New research trends emerge every day to achieve sustainable production, such as aquafeed research to generate innovations and thus achieve sustainable aquaculture. The innovative trends worldwide today in aquaculture nutrition are, for example, the use of probiotics, prebiotics, animal by-product flours, vegetable flour, insect flour, and microalgae oils, among others. This Special Issue aims to gather research (original research articles, perspectives, and reviews) that focuses on the advances in feedstuffs for sustainable and innovative aquaculture.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
