

## Special Issue

# Processing, Safety, and Responses to Pathogen Infection and Immunization of Fishes

### Message from the Guest Editors

Fishes are high-quality foods that can provide us with essential nutrients, including proteins, unsaturated fatty acids, and minerals. However, problems continue to emerge due to the rapidly increased cultivation, processing, and consumption of fishes all around world. To maintain a healthy fish industry and obtain a better understanding of the processing and safety of fish and fish immune systems, we are launching this Special Issue that focuses on recent advances in the cultivation of fishes and processing of fish products, as well as novel findings in the fish immune system. All studies related to these topics are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
