New Sources of Proteins for Aquaculture Feeds

Message from the Guest Editor

Special Issue Information This call for “new sources of proteins for aquaculture feeds” aims to identify new sources different from plant proteins, which, apart from being unsustainable, have a highly variable cost dependent on the source. Thus, in order to promote more sustainable value chains, local sustainable protein production becomes important, and other sources like fisheries’ discards, fish processing byproducts, poultry byproducts, meat and bone meal, distillers’ spent grains or spent yeast, single cell proteins, or other type of byproducts are considered interesting sources for aquaculture feeds. This Special Issue aims to create a comprehensive and up-to-date collection of the current knowledge regarding the use of such protein sources in both fresh and marine aquaculture, with a special emphasis on the identification of those aspects already well established as well as those aspects still requiring further research.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
