Special Issue

Sustainable Aquaculture and Fisheries

Message from the Guest Editor

The journal *Fishes* is preparing a Special Issue entitled "Sustainable Aquaculture and Fisheries." Ecosystembased management of fisheries has become one of the important measures for contemporary management of fisheries stocks. Understanding the biological behaviours and population status of exploited species is essential for management strategies. Equally, understanding functionality and services of aquaculture ecosystems will help achieve the goal of ecosystembased management of aquaculture. Aquaculture may affect the ecosystem and hence recruitment of fisheries species in coastal ecosystems. Knowledge of interactions between cultured and wild species is essential for management of the ecosystems. The main aim of this Special Issue is to provide an opportunity for scientists to give an overview of recent works carried out in these areas of aquaculture and fisheries research. Papers on the interactions between aquaculture and fisheries, fisheries biology and ecology, aquaculture environment, new species, and modelling are welcome.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of Fishes is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider Fishes for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
