Deadline for manuscript  
submissions:

**closed (20 December 2022)**

### **Message from the Guest Editor**

Often a useful tool, but occasionally a disaster, fire has accompanied humankind for millennia. Protecting from coldness, darkness, predators, and stomach bacteria, combustion brought primitive, tribal humans into the modern industrial civilization, and it will likely remain the major provider of energy for industry, heating, and transportation in the foreseeable decades. Next-generation combustion technologies are expected to be environmentally friendly, safe, and energy-efficient, and the role of numerical methods in the design and development of such advances is emerging today.

The aim of this Special Issue is to collect recent analytical and computational advances in the fields of reacting fluids, including (but not limited to) premixed flame dynamics and morphology, turbulent burning, flame acceleration, and combustion instabilities.

This Special Issue is dedicated to the memory of Professor Vitaly Bychkov (1968–2015), whose contributions into combustion theory and modeling, with his in-depth studies of hydrodynamic combustion instabilities, flame acceleration, and deflagration-to-detonation transition, are hard to overestimate.

## Editor-in-Chief

### **Prof. Dr. D. Andrew S. Rees**

Department of Mechanical  
Engineering, University of Bath,  
Bath BA2 7AY, UK

## Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.8 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2022).
