Message from the Guest Editors

Dear Colleagues,

In 1638, Galileo remarked “In aquatic animals (therefore) circumstances are just reversed from what they are with land animals inasmuch as, in the latter, the bones sustain not only their own weight but also that of the flesh, while in the former it is the flesh which supports not only its own weight but also that of the bones.” Since his times, we analyzed many aspects of life in aquatic and terrestrial environments in great details, but mostly within and not in-between these environments. In this session, we will present comparisons, point to differences, and highlight evolutionary pressures that forced different solutions to common problems experienced by living entities in these two environments.

Prof. Dr. Hidekatsu Yamazaki

Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q2 (*Mechanical Engineering*)
