

## Special Issue

# Heat Transfer Enhancement Mechanisms and Techniques

### Message from the Guest Editors

This Special Issue is devoted to the mechanism and technique of heat transfer enhancement. These are central to industries such as the thermal power industry, nuclear power, food manufacturing, chemical industry, electronics and petroleum in the context of the global energy shortage. The main research objective of heat transfer enhancement technology is to improve heat transfer capacity and efficiency by enhancing heat conduction, convection or radiation heat transfer processes, among which the most widely studied is the enhancement of convection heat transfer. Convection heat transfer enhancement methods can be divided into active enhancement methods and passive enhancement methods. In this Special Issue, we invite submissions that explore cutting-edge research and recent advances in the mechanism and techniques of heat transfer enhancement.

---

### Guest Editors

Prof. Dr. Wei-Tao Wu

School of Mechanical Engineering, Nanjing University of Science and Technology, Nanjing 210094, China

Prof. Dr. Zhifu Zhou

State Key Laboratory of Multiphase Flow in Power Engineering, Xi'an Jiaotong University, Xi'an 710049, China

---

### Deadline for manuscript submissions

closed (1 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

---

### Editor-in-Chief

Prof. Dr. D. Andrew S. Rees

Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
