

Special Issue

Non-Newtonian Flow: Interfacial and Bulk Phenomena

Message from the Guest Editors

This Special Issue of *Fluids* is dedicated to the study of interfacial phenomena where the interface and/or bulk fluids are complex. The non-Newtonian response of such systems plays an important role in numerous applications. The Special Issue aims to reflect on the current work and recent progress in how the coupling between bulk flow and interfacial flow manifests in the overall system response. Contributions of experimental, computational, and/or theoretical work are welcome. Topics may include applications to industrial, physiological, or measurement systems.

About the Journal

Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

Editor-in-Chief

Prof. Dr. D. Andrew S. Rees

Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
