

## Special Issue

# Phase Change and Convective Heat Transfer

### Message from the Guest Editors

Heat transfer is involved in many industrial applications such as heat exchangers, electronic cooling, solar collectors, cooling of nuclear reactors, etc. This is one of the main topics of thermal engineering, an area of research that is attracting the attention of an increasing number of researchers. This Special Issue aims at gathering high-quality papers highlighting recent advances in phase change and convective heat transfer. New advances in heat transfer improvements, theoretical approaches of heat transfer mechanisms and reports of successful applications of new heat transfer materials are pursued.

## About the Journal

### Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
