# **Special Issue**

# Frontiers in Bio-Heat Transfer

## Message from the Guest Editor

This Special Issue of *Fluids* shall be devoted to the broadly understood problems of bio-heat transfer. We anticipate the publication of works on "whole domain models", local models based on the well-known Pennes equation as well as the Cattaneo–Vernotte equation or dual phase lag equation, and finally, models which take into account the presence of large, thermally significant blood vessels. Papers may also concern numerical simulations of medical procedures, such as the local heating and cooling of tissue (hypo and hyperthermia), cryosurgical treatments, etc. Works on experimental research and review articles will also be accepted.

#### **Guest Editor**

Prof. Dr. Bohdan Mochnacki Rector of University of Occupational Safety Management in Katowice, 40-007 Katowice, Poland

#### Deadline for manuscript submissions

# Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

### Editor-in-Chief

Prof. Dr. D. Andrew S. Rees Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

## Author Benefits

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
