# **Special Issue**

# Flow and Heat Transfer in Nonlinear Fluids

### Message from the Guest Editor

Non-Newtonian (non-Linear) fluids are common in nature, for example, mud, honey, but also in many chemical, biological, food, pharmaceutical, and personal care processing industries. This Special Issue of Fluids is dedicated to the recent advances in the heat transfer and flow of non-linear fluids. Contributions on experimental, mathematical, physical and computational aspects of these fluids with industrial applications are welcomed. These fluids include the traditional non-Newtonian fluids, electro- or magnetorheological fluids, granular materials, slurries, drilling fluids, polymers, blood and other biofluids, mixtures of fluids and particles, etc.

# Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

## Editor-in-Chief

Prof. Dr. D. Andrew S. Rees Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

# Author Benefits

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
